

Oyelakin Oluwadamilare Emmanuel

PROFESSIONAL SUMMARY

Software engineer and researcher with a passion for building scalable web applications, and working with the data flow in those applications. I love the thrill of solving problems and overcoming challenges.

EXPERIENCE

FINDTHEPRO // April 2018 - present

SOFTWARE ENGINEER

- I was responsible for building rest APIs.
- Programming well-designed, testable, efficient code
- Producing specifications and determine operational feasibility
- Creating database schemas that represent and support business processes
- I used code versioning tools, such as Git to keep track of my codes
- I used continuous integration and deployment tools like Travis ci, git bucket pipeline and docker

AFRILAB MEDICAL DIAGNOSTICS // Feb. 2018

FREELANCE WEB DEVELOPER

- I developed a web-based application that allowed the laboratory users book for lab appointments online.
- The application also helps in tracking all transactions carried out by the laboratory.
