Oluwadamilare Oyelakin

Software Engineer

👤 Profile

I am a Software engineer with passion for building scalable web applications, and working with the data flow in those applications.

I love the thrill of solving problems and overcoming challenges.

💼 Employment History

Software Engineer at TeamApt, Lagos
September 2019

- Produce clean, efficient code based on specifications using Java Spring framework
- Integrate software components and third-party programs
- Troubleshoot, debug and upgrade existing enterprise software

Software Engineer at FindthePro, Ibadan
July 2018 — August 2019

- Programmed well-designed, testable and efficient code to solve business problems
- Responsible for designing and development of applications according to design specifications.
- Documenting and maintaining software functionalities
- Developed applications with a team in an agile environment
- Optimized database query run time by caching and indexing data using elasticsearch
- I use continuous integration, deployment and monitoring tools like bitbucket pipeline, docker and new relic.

Go-To App

Freelance Web Developer at AFRILAB MEDICAL DIAGNOSTICS, Ibadan

- I developed a web-based application that allowed the laboratory users to book for lab appointments online.
- The application also helps in tracking all transactions carried out by the laboratory
